REMARKS

During the past fiscal year the schools have completed thirty-six full weeks in all except one school. At No. 9, on account of the decrease in attendance and no boarding accommodations for the teacher, we have closed the school. The remaining four pupils go to No. 2.

Average success in the schools has been attained throughout the year. On account of the increased cost of fuel, supplies and wages, both of teachers and janitors, it is with great care we have been able to keep the total expenditures within the income and avoid a deficit.

By law the end of the fiscal year is set ahead to August 31st. The treasurer's report, herewith, gives the income and expenditures in total to February 15 as usual, but this fiscal year runs on to next September and the report in full will appear in next year's report. This change makes it necessary to raise at this time enough money to carry the schools through the spring term. This extra amount must be raised under Article 10 in the warrant.

By law, too, we are obliged to insert in the warrant an article in regard to medical inspection in the schools. Medical inspection is a benefit to the children and is working great good in the districts where it has been adopted. We simply recommend it, as provided under the law and the district can avail itself of its benefits or not as it seems best at this time.

No one can foretell what prices and conditions will be during the next year, but in our estimates and recommendations we have tried to get the figures as nearly right and as low as possible. To keep the schools open we must have fuel, janitors and teachers. We assure you the board is anxious to, and will earnestly strive to keep the expenses as low as is consistent with securing the supplies and services required.

RECOMMENDATIONS

We recommend that the district raise and appropriate under the various articles in the warrant as follows:

Art. 7, \$3,100 in addition to the amount required by law.

Art. 8, \$200 as usual.

Art. 9, \$150 if the medical inspection is adopted.

Art. 10, \$3,400 for full support of schools from Feb. 15 to Aug 31.

To the Selectmen:

In conformity to law the board recommends the following assessments for the ensuing year:

High school tuition,	\$1,800 00
Books and supplies,	500 00
Flags and appurtenances,	25 00

The amount required by law to be raised for the support of schools in Swanzey is \$2,002.50.

W. G. GOODELL,

H. W. BROWN,

THE WORK OF THE SCHOOLS

One who has the supervision of a public school system keenly feels his responsibility in the matter of getting the best results in school work and he is constantly trying to improve the condition of the schools under his charge.

Children are created with unequal ability. They may have certain equal rights but they do not all have the same power to learn through the doing of their various school tasks. This is apparent as soon as children enter the first grade and continues to be evident through the grades. The school is not a machine that can take all kinds of children into the first grade and grind out a uniform set of pupils of equal abilities and attainments at the end of the eighth grade. They will differ at the end as they differed at the beginning.

The school presents equal opportunities for all, and a certain minimum standard of attainment is established for promotion and graduation, but beyond this minimum requirement the knowledge and abilities of pupils differ widely. The same is true of classes as a whole. They vary as their individual members vary. Home environment and heredity have much to do with the kind of work children do in school, and the best some children can do often falls far short of standard requirements. If, however, we can get children to do their best, to ap-

ply themselves to their school tasks with a determination to win, we should be satisfied with the result.

Education from bottom to top needs more than anything else to be individualized. It is not always easy, however, to suit the instruction to the individual child. Children's power to assimilate the work of any grade depends more upon the stage of maturity than upon the number of years they have lived.

At the close of the school year Miss Campbell accepted a position in Winchester and Mrs. Alice D. Matthews, a teacher of experience, was engaged for the position. Miss Bradstreet at No. 5 declined a reelection and as her successor Miss Glendon was transferred from No. 9. Miss Helen Ward, a graduate of the Keene normal school, was engaged to fill the vacancy in No. 9. In December she resigned and the school was closed, the children being transferred to the East Swanzey schools. In January Miss Grogan at the Westport school resigned and Miss Glendon was transferred to the position. Mrs. Grace Carlin, an experienced teacher was engaged to teach at No. 5.

During this year the schools have been visited by Miss Weed, Mr. Carlisle and Mr. Burt in the interest of the extension club work. Although the number who took up the work was not large, some good results were obtained, and the outlook for more extensive activity next year is excellent.

Aside from the usual exercises held in the schoolrooms in observance of the several holidays the teachers of the Cutler school conducted a successful entertainment from which they realized a goodly sum. With the proceeds a victrola and twenty-four records were purchased for the school.

Through the generosity of Mr. Henry W. Brown the children of the Cutler school have a slide and a vaulting apparatus added to their playground equipment.

A prize speaking contest open to the pupils of Swanzey public schools was held in Whitcomb Hall on June 1. There were eleven speakers. The winners were as follows: First prizes:

Helen Sarsfield and Reginald Lane. Second prizes: Winston Emery and Florence Underwood. Iva Handy received honorable mention.

In January the initial campaign to start the school children in saving through buying Thrift Stamps was inaugurated. Forty-seven children have purchased \$163 worth of stamps. Interest in the matter continues and the savings are constantly growing.

All the schools are enthusiastically engaged in Red Cross work. This work includes cutting fillings for pillows, knitting scarfs, wash cloths, and making patchwork for quilts.

During the summer vacation the usual repairs were made to put the buildings into good condition. The chief item of expense was the painting of the East Swanzey school house.

SCHOOL HYGIENE

For years in the erection of our school buildings we have applied the fundamental principles of sanitation. Necessary as this is our primary concern should be the hygiene of the growing child. The war has clearly demonstrated to the surprise of most of us the extremely small percentage of physically perfect manhood, and has hastened the day when the health and physical welfare of a child will be regarded of as much importance as arithmetic and when a knowledge of the elements of child hygiene will be regarded as of primary importance in the training of every teacher.

It has been reliably estimated that the general adoption of a few well-established hygienic principles would add fifteen years to the average span of human life. In bringing about this better condition, however, our sole reliance cannot be upon medical science and public health administration. We must educate

the new generation to a different hygienic viewpoint and develop in the young the necessary hygienic habits.

Medical inspection in scores of American cities demonstrates that two-thirds of the school children are subject to physical defects which are injurious to health. Many are suffering from malnutrition, one half the children have from three to five defective teeth, one in ten suffers from nose and throat troubles including adenoids and enlarged tonsils, one in five has defective vision. These are only a part of the findings.

Entrance upon school life tends to effect adversely the health of a child. The sedentary life of the schoolroom, taking the child as it does from the open air, freedom of movement, and the sunshine, subjects him to an unnatural routine which disturbs all his vital functions. The tendency of school life should be favorable to the improvement of the child's health.

To accomplish this ideal we must regard the cultivation of health of as much importance as the accumulation of knowledge; we must observe the laws of fatigue in the school day; we must secure a proper balance between seatwork, manual training and play; we must teach the child how to protect his health and to build up his strength; and finally we must install a system of medical inspection. This at its best should include a school physician, a school nurse and a school dentist.

The time is not ripe, however, for the employment of all these various agencies. A school nurse acting under the supervision of a medical inspector would probably give the best results. Eighteen towns in New Hampshire now have medical inspection. The cost varies from \$10 to \$300 and averages about \$100.

Respectfully submitted,

ANDREW P. AVERILL.
